### ▶ Conveyors - Material Handling Equipments

Conveyors ensures an optimized, automated flow of material, resulting in increased productivity, lesser space & manpower requirements. Material handling equipments are very critical in painting lines.

**Precision offers following types of conveying systems used for material movement in the painting lines.**

- Manual push pull monorail conveyor – For Batch Type/Heavy parts movements.
- Overhead electric hoist system used in dip pre-treatment.
- Fully automatic PLC based Transporter system with flight bars/Cages used in Dip PT/ED Coatings.
- Belt /Wire-mesh surface conveyor – For Tunnel Ovens.
- Enclosed track continuous power conveyors – Most Common in Painting applications. Heavy duty I- beam continuous power conveyor
- Power and free conveyors
- Single track ground mounted chain conveyor with skid/trolley pushing facility
